State of the Mobile Web, November 2008

December 19, 2008

2008 is winding down and with it comes the inevitable review of what transpired during the year. Experts predicted this year as the year when the mobile Web would become mainstream. Our numbers from previous reports on Africa, Latin America and Southeast Asia have confirmed that indeed the mobile phone has come into its own as a platform for the Web. More people viewing more pages on mobile phones is the clear trend.

This year we've looked mainly at countries where the mobile Web is essential. PC penetration and broadband penetration are lower in those countries than in other areas. What about countries where broadband penetration is high, and where PCs are affordable and easy to obtain? Our final State of the Mobile Web for 2008 looks at both North America and Europe to see what happens when the mobile Web goes up against the wired Web.

Not surprisingly, the results show that mobile Web usage still exhibits strong growth. In some countries that have high broadband penetration, we believe the mobile Web is growing partly because consumers have grown accustomed to connectivity. They are never truly unplugged from the Web. They simply access it from a number of different devices.

Worldwide, the mobile Web has incredible room for growth. The next billion people will come online with a mobile device. I hope we look back on 2008 not as the year the mobile Web went mainstream, but as the year people realized that we have One Web that we access through a multitude of devices. The closer we come to realizing that critical point, the closer we come to tapping the vast potential of the mobile Web.

I wish you happy holidays and a festive New Year.

Kind Regards,
Jon S. von Tetzchner, CEO, Opera Software

Highlights

- In November, the United States shot up the rankings, moving from position seven to three in the top ten list of Opera Mini-using countries. India fell two places, from three to five, and Egypt fell two places from eight to ten in a reversal of its meteoric rise in the previous two months. In 2009, we will watch carefully to see if Egypt remains in the top ten ahead of Germany.

- This month's geographic focus is on two regions: North America and Europe.

Part 1: Growth

Number of Users

Due to a technical issue this month with the active user counter, the Opera Mini active user statistics will return in January 2009.

Pages Transcoded

Opera Mini users viewed more than 5.7 billion pages in November. Since October, page views have gone up 12.1%. Since November 2007, this number is up 303%.
Part 1: Growth continued

Data Consumed
In November, Opera Mini users generated more than 82.9 million MB of data for operators worldwide. Since October, the data consumed went up by 12.5%. Data in Opera Mini is compressed 90% on average. If this data were uncompressed, Opera Mini users would have viewed over 829 million MB of data in November. Since November 2007, data traffic is up 463%.

Part 2: Country snapshots for November 2008

Snapshot: Russia
• Yandex remains the search engine of choice for Russian users of Opera Mini. Google retains its number six position, and Yahoo is back on the list at number ten after a three month absence.
• Wikipedia and My Opera, popular sites among Opera Mini users in several other countries, are new to the top ten list in Russia.

8) wapos.ru (down from 7)
9) wikipedia.org (new)
10) yahoo.com (back on the list)

Snapshot: Indonesia
Entering the list at position four last month, Facebook is now at position three. Facebook appears to be the alternative social network of choice among Indonesian users of Opera Mini.

Top 10 sites in Indonesia (# of unique users)
1) friendster.com
2) google.com
3) facebook.com (up from 4)
4) gamejump.com (down from 3)

7) waptrick.com (down from 6)
8) peperonity.com (down from 7)
9) getjar.com
10) wikipedia.org (down from 8)

Snapshot: India
• The top ten list in India did not exhibit much change, with no new sites and only a handful of sites switching places with each other.
• With Yahoo out of the top three, Google is dominant this month.

Top 10 sites in India (# of unique users)
1) google.com
2) orkut.com
3) gmail.com (up from 4)
4) yahoo.com (down from 3)

7) live.com (down from 6)
8) youtube.com
9) gamejump.com (up from 10)
10) myspace.com (down from 9)

Snapshot: Poland
The only change this month is the debut of Sciaga.pl, an education-related site.

Top 10 sites in Poland (# of unique users)
1) nasza-klasa.pl
2) google.com
3) lajt.onet.pl
4) allegro.pl
5) wikipedia.org
6) wp.pl
7) fotka.pl
8) youtube.com
9) gamejump.com
10) sciaga.pl (new)

Snapshot: Egypt
The top ten list in Egypt is apparently starting to stabilize. The only new sites are Metacafe (videos) and Yallakora (sports).

Top 10 sites in Egypt (# of unique users)
1) google.com
2) facebook.com
3) gamejump.com
4) youtube.com
5) my.opera.com
6) bbc.co.uk (up from 7)
7) yahoo.com (down from 6)
8) friendster.com
9) metacafe.com (new)
10) yallakora.com (new)
Part 3: Spotlight on Europe

- With the major exception of Yandex in Russia, Google is the dominant search service in the region.
- Despite the success of a few local social networking sites, Facebook has made significant inroads into Europe.
- Nokia and Sony Ericsson dominate in Europe. The Nokia 6300 is extremely popular among Opera Mini users in that region.

Top fourteen countries snapshot

Snapshot: Russia

- Page-view growth since January 2008: 182.6%
- Yandex remains the search engine of choice for Russian users of Opera Mini. Google retains its number 6 position, and Yahoo is back on the list at number ten after a three month absence.
- Wikipedia and My Opera, popular sites among Opera Mini users in several other countries, are new to the top ten list in Russia.

6) LG KE970
7) Nokia N73
8) Nokia N82
9) LG KU990
10) Sony Ericsson W810i
Part 4: Spotlight on North America

In the United States, BlackBerry devices are extremely popular among Opera Mini users. Mexico is more like Europe, in that Opera Mini is used primarily on Nokia and Sony Ericsson handsets. Canada falls somewhere in between, with an emphasis on BlackBerry.

Top three countries snapshot

Snapshot: United States

- Page-view growth since January 2008: 200.9%
- The mobile social networking wars are heating up. For the first time, Facebook has surpassed MySpace on the top ten list in the United States. Friendster, which became much more popular in other regions of the world, is a surprising newcomer to the list.
- After a five month absence, CNN is back on the list, possibly in conjunction with the US national election.
- Released by AT&T in early November, the BlackBerry Bold made an immediate impact and is high on the list of top handsets preferred by Opera Mini users in the US.
- Opera Mini is also used on the Samsung Blackjack II (a Windows Mobile device) and the highly popular Samsung Instinct.

Top sites ranked by unique users:

1) google.com
2) facebook.com (up from 3)
3) myspace.com (down from 2)
4) wikipedia.org
5) yahoo.com
